Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	3 october2026
Team ID	SWTID-2026-9253
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**Import Source Data**	Load employee data from the source file into an Import Set
FR-2	**Create Transform Map**	Create a Transform Map between the Import Set table and Employee Test target table
FR-3	**Map and Match Fields**	Use Auto Map Matching Fields and Map Assist to map source fields to target fields; configure Coalesce for record matching
FR-4	**Transform and Verify Data**	Transform the imported employee data into the Employee Test table and verify the result using Transform History

Non-Functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The import and transformation process should be simple and easy for a ServiceNow administrator to follow and manage.
NFR-2	**Security**	Employee data should be handled within the authorized ServiceNow environment and accessed only by permitted users.
NFR-3	**Reliability**	The system should consistently import, map, and transform employee records correctly.
NFR-4	**Performance**	The system should process the imported employee records efficiently without unnecessary manual processing.
NFR-5	**Availability**	The import and transformation features should be available whenever the administrator needs to perform the data-import process.
NFR-6	**Scalability**	The process should support importing additional employee records without requiring a completely different workflow.
